

Country Quota Profile

A. Country wise quota profile

1. Status of quotas in each country

In Vietnam there is no special status of quota. A gender equality law is in the process of discussion at the actual session of the parliament and is going to be approved in December 2006.

There are two main views on these issue:

1. It is necessary to set up quota for women parliament members: 30%, ministries and Departments: 30 % and women labour force should have 30 % women representative in leadership/management boards.
2. It is not agreed to have quota for women participation in parliament as it depends on elections and the problem of women's capacity/low education, especially in remote and mountainous areas.

2. Form of quotas
